About Me

What started out as a passion over 3 years ago has succeeded in being my career. The more I learn, the more I am able to do and the more exciting it gets and it is this very excitement that makes me get through the difficult times. Below you'll find my experience and projects I've completed that showcase my skills and general background in software development.

Experience

Mobile Developer - WhatIDo, USA, 10/22 - present

Web Developer - Floppiess Inc, Germany, 10/21 - present

Worked on a multivendor e-commerce project where I integrated user authentication, cart, wishlist, vendor dashboard features which includes management of products, customer orders, vendor data e.t.c Technologies used include Nextjs, Headless Wordpress, e..t.c

Mobile Developer - Anambra Broadcasting Station, Nigeria, 4/21 - 3/22

Report
https://play.google.com/store/apps/details?id=com.reportcrime
https://github.com/ValentineCodes/Report-App
Built an app which solves a problem of security(awareness) by enabling users to send crime reports to a central authority along with their exact location, a video recording, and more. Built with React Native, Firebase, Geolocation, Map, Push Notification, Git, e.t.c.

Report-Admin
https://play.google.com/store/apps/details?id=com.reportadmin
https://github.com/ValentineCodes/Admin
Built an app which receives the security reports from the "Report" app described previously. Built with React Native, Firebase, Geolocation, Map,

Push Notification, Git, e.t.c.

Krabs
https://play.google.com/store/apps/details?id=com.krabs
https://github.com/ValentineCodes/Krabs
Built an app for money management which helps users make smarter financial decisions by enabling them keep track of their daily expenses. Built
