About Me

What started out as a passion over 3 years ago has succeeded in being my career. I've worked on multiple projects with startups and companies in the web2 space as a mobile and web developer. Now I'm fully dedicated to creating a meaningful impact in the web3 space.

Experience

Blockchain Developer - BuidlGuidl, USA, 03/23 - present

Yield: A Liquid Restaking Protocol

https://github.com/ValentineCodes/yield

Built a protocol which enables users to stake stETH into Eigenlayer to earn extra rewards. Admins(a multisig wallet) can delegate and undelegate to an operator and also withdraw assets. Built with Next.js, Solidity, Ethersjs, WalletConnect, e.t.c

Scaffold-ETH React Native

https://github.com/ValentineCodes/scaffold-eth-react-native

Built an open-source toolkit for building decentralized applications seamlessly using React Native & Hardhat; Creating synergy between smart contract and frontend development. Built with React Native, Hardhat, Ganache, Ethersjs, e.t.c

Paux Wallet

https://play.google.com/store/apps/details?id=com.paux.wallet
https://github.com/ValentineCodes/paux

Built a safe and secure crypto wallet to generate accounts, manage tokens, transfer funds, interact with dApps and more on multiple EVM-compatible chains. Built with React Native, WalletConnect, Ethersjs, e.t.c

Snowman

https://snowman-eight.vercel.app/
https://github.com/ValentineCodes/snowman

Built an ERC4883 Composable NFT to mint a unique snowman and decorate with other NFTs(Hat, Scarf, e.t.c). Built with Next.js, Solidity, Ethersjs, WalletConnect, .e.t.c

Skills

Solidity
Typescript | Javascript
