About Me

 What started out as a passion over 3 years ago has succeeded in being my career. I've worked on multiple projects with startups and companies in the web2 space as a mobile and web developer. Now I'm fully dedicated to creating a meaningful impact in the web3 space.

Experience

Blockchain Developer - BuidlGuidl, USA, 03/23 - present

Scaffold-ETH React Native

https://github.com/ValentineCodes/scaffold-eth-react-native

Built an open-source toolkit for building decentralized applications seamlessly using React Native & Hardhat; Creating synergy between smart contract and frontend development. Built with React Native, Hardhat, Ganache, Ethersjs, e.t.c

Paux Wallet

https://play.google.com/store/apps/details?id=com.paux.wallet
https://github.com/ValentineCodes/paux

Built a safe and secure crypto wallet to generate accounts, manage tokens, transfer funds, interact with dApps and more on multiple EVM-compatible chains. Built with React Native, WalletConnect, Ethersjs, e.t.c

Token Wrapper

https://token-wrapper.vercel.app
https://github.com/ValentineCodes/token-wrapper

Built a decentralized application to wrap native and ERC20 tokens on multiple EVM-compatible chains. Built with Next.js, Solidity, Ethersjs, WalletConnect, e.t.c

Snowman

https://snowman-eight.vercel.app/
https://github.com/ValentineCodes/snowman

Built an ERC4883 Composable NFT to mint a unique snowman and decorate with other NFTs(Hat, Scarf, e.t.c). Built with Next.js, Solidity, Ethersjs, WalletConnect, .e.t.c

Skills

Solidity
Typescript | Javascript
React Native
React | Next.js
TailwindCss
Redux
Firebase
Git | Github

Education

Nnamdi Azikiwe University, Anambra
Bachelor of Science in Computer Science
